1. From the Control4 app tap the cameras icon.

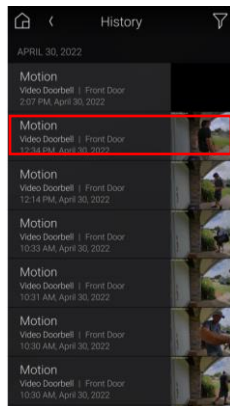

2. The live video doorbell image should be displayed.

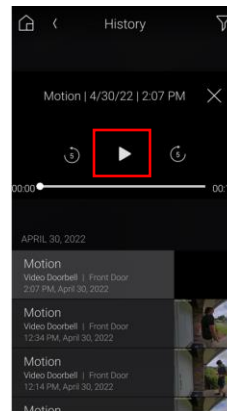

3. Tap the rewind icon in the top right corner to view historical activity.

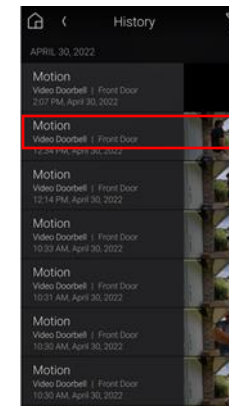

4. The list of historical activity should be displayed. Tap the event you would like to watch.

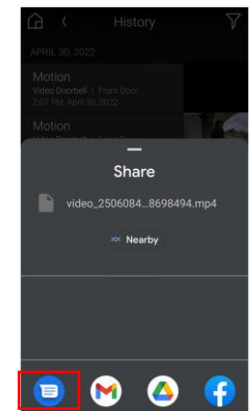

5. Press play. If you would like the video to record a longer clip, your dealer can extend the recording to up to 20 seconds for you.

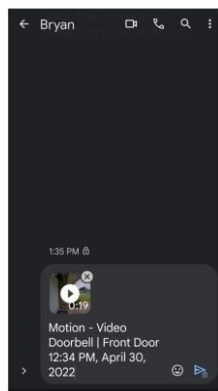

6. To text a video clip, press and hold your selection.

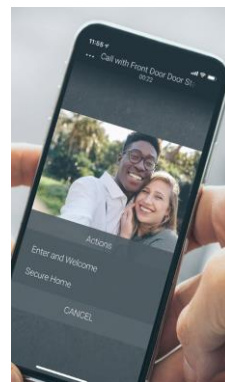

7. Tap your text message icon and choose a recipient.

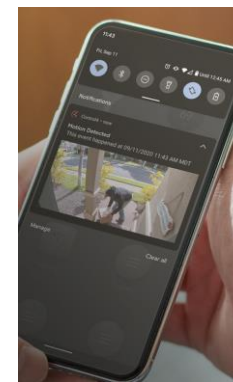

8. The video clip should be automatically added to your text message and it's ready to send.

9. A doorbell press initiates a call to your phone so that you can speak to the person at the door. Your dealer can add buttons to lock and unlock the door. Choose any way file to customize your doorbell sound.

10. Would you like to know when your packages are delivered? Your dealer can set up push notifications so that you receive a notification on your phone with a picture to see what motion was detected even if the doorbell wasn't pressed.

11. To watch a short video on the Control4 Chime Video Doorbell, click [here](#).
